

Hi Mike

It's been a while now since I have finished my Kitchen using Smart Pack products. You might remember me from my old previous email address [jbarnett@hatch.com.au](mailto:jbarnett@hatch.com.au)<mailto:jbarnett@hatch.com.au>

I thought I'd send you some photos of the completed project (and whilst the kitchen is clean and tidy for a change!!) so you can add them to your archives.

I must say, I was nothing short of amazed at the accuracy and ease with which all the cupboards/cabinets/doors etc went together. You have a very fine quality product that you should be proud of.

The package arrived in WA smack bang on time, and I assembled the whole lot (...and I'm a one man band) within a weekend. So I'm proud to say now, that I completed the entire project myself without the use of a single tradesman or professional. (I suppose I'm a Jack of all trades, but the accuracy and ease of your product made the starting block of the job so easy and hassle free!) I must also mention how grateful I am for your time and efforts in the "design"

phase of my Kitchen. No question was too small or annoying for you, and your responses were always very prompt and well detailed. On top of the service - I think your prices are very reasonable too.

...and one more thing before I go, as a Mechanical Design Engineer, I was absolutely impressed with the 3D design package that you have put together!

An excellent tool that sells the product itself! Fantastic.

I hope you enjoy these photos, and thanks again for all your time and effort.

Cheers,

James Barnett  
Mechanical Designer
